***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach nor suggest a hinge in the entire claimed combination including a side face of two upright walls formed with a saddle having positioning recesses defined therein and a limiting block is formed on a side face of at least one second arm to correspond to the positioning recesses such that when the at least one second arm is pivoted relative to the base, the limiting block is moving in the positioning recesses to provide a temporary positioning effect to the at least one second arm, as claimed. Nor does the prior art teach or suggest at least one fixing seat having two positioning wedges formed on a side face of the at least one fixing seat and a second washer assembly applied to a pivotal engagement between the fixing seat and the bracket, the second washer assembly has a stop formed to correspond to the two positioning wedges so that when the bracket is pivoted relative to the at least one fixing seat, movement of the stop between the two positioning wedges prevents excessive travel of the display, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
